

Special Issue

Sustainable Urban Planning: A Gender Perspective

Message from the Guest Editor

- Marion Roberts (2019) has argued how key gender issues in planning, including the agendas on care and women's representation, among others, have been coopted by neoliberalism and largely voided of their transformative capacity. According to Roberts, this process was reinforced by the negative, if unintended, consequences of the recent preeminence of recognition versus redistribution as the core principle underlying feminist agendas.
- This special issue seeks to explore ways to buttress the transformative potential of gender perspectives in urban planning, by bringing redistribution back as a core principle of gender equality agendas in urban planning.
- Suggest themes:
- Research on gender perspectives that address land-use legislation and regulation, zoning ordinances, regional planning, municipal level planning, transportation planning, facility planning, infrastructure planning, housing policies, regeneration and redevelopment projects, and direct public interventions in land and real estate markets, to create gender responsive infrastructure, transportation, facilities, employment spaces, and housing.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
