

Special Issue

Advances in Environmental Management and Resource Economics for Sustainable Development

Message from the Guest Editors

This Special Issue invites research at the intersection of environmental management and resource economics. We seek contributions that explore how micro- and macro-level decision-makers can internalize environmental externalities, design resilient and equitable resource supply chains, and manage trade-offs between economic growth, environmental sustainability, and geopolitical stability. We welcome submissions covering resource supply chain resilience under geopolitical shocks, environmental and economic assessment of critical material substitution, circular economy strategies for reducing primary resource dependence, optimization of resource allocation and operational decisions under environmental constraints, and policy instruments for securing sustainable resource flows. Both original research and reviews are welcome. By fostering interdisciplinary collaboration, this Special Issue aims to advance practical pathways toward secure, efficient, and low-carbon resource systems.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon
School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
