

Special Issue

Online Consumer Behavior: Multidisciplinary Approaches

Message from the Guest Editors

This Special Issue welcomes the submission of research on digital marketing and consumer behavior that can facilitate the decision-making procedures of companies and administrations, and have a positive impact on both environment and community. Multidisciplinary approaches are of interest in this Special Issue. We have chosen to focus on multidisciplinary analyses of digital consumer behavior, prioritizing those carried out by teams made up of members from different—and distant—areas of knowledge. Multidisciplinary approaches are common in the fields of artificial intelligence, augmented reality, metaverse, and neuromarketing; they are frequently used to develop innovative methodologies in the digital marketing area. These approaches enrich research results. The transfer potential of the results is another common denominator of the papers included in this issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits
