

## Special Issue

# Green Building Intelligence: Evaluating Energy Efficiency and Renewable Energy Solutions

### Message from the Guest Editors

Achieving carbon neutrality in the built environment hinges on the integration of innovative renewable energy technologies and rigorous energy efficiency evaluations in green buildings. This special issue invites contributions that examine both the technological innovations and performance assessments necessary to optimize renewable energy systems in building design. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- Building-Integrated Renewable Energy Systems.
- Energy-Efficient Building Designs.
- Smart Energy Management for Buildings.
- Renewable Energy for Urban Infrastructure.
- Scaling Renewable Energy from Buildings to the Grid.
- Energy Storage Technologies.
- Renewable Energy in Rural and Agricultural Contexts.
- Policy and Economic Models.
- Socio-Economic Impacts.
- Cross-Sectoral Applications.

This special issue invites interdisciplinary research that spans the entire spectrum of renewable energy deployment—from individual buildings to expansive energy networks—providing holistic and scalable strategies for achieving carbon neutrality.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
