

Special Issue

Environmental Protection and Sustainable Ecological Engineering Volume II

Message from the Guest Editors

Environmental protection seeks to conserve natural resources and restore ecosystems. Ecological engineering, which integrates ecology and engineering, has emerged as a powerful tool to achieve these goals by sustainably managing ecosystems for the benefit of both society and the environment. This Special Issue aims to bridge science, engineering, and socio-economics, fostering a multi-disciplinary approach to address sustainability challenges through ecological engineering. We invite original research and reviews on topics including, but not limited to:

- Nature-based solutions for environmental protection.
- Green infrastructure.
- Soil and water bioengineering techniques for environmental protection.
- Efficiency of ecological engineering measures.
- Life-cycle analysis of environmental protection measures.
- Building information modeling for environmental protection.
- Geo-environmental engineering.
- Socio-economic analysis of environmental protection.
- Use of vegetation for environmental protection.
- Aesthetics drivers for environmental protection.
- Mitigation of hydro-meteo hazards.
- Geotechnical engineering.
- Bio-stabilization and bio-reinforcement of soils.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
