

Special Issue

Quality of Life in the Context of Sustainable Development

Message from the Guest Editors

The link between quality of life and sustainability is crucial, as the two concepts intersect and complement each other. Sustainability is based on three pillars: economic, social and environmental, each of which has a direct impact on the quality of life of individuals and communities. Research areas may include (but not limited to) the following: Study of quality of life in relation to current global challenges; Quality of life at the global, national and local levels and the implementation of the SDGs; Using artificial intelligence as a tool to identify similarities between definitions of quality of life and sustainability; Interactions between SDGs with a focus on SDG3; Measuring quality of life and proposing quality of life indicators in relation to sustainable development; The impact of the environment on the quality of life; Climate change and quality of life; The impact of green areas on quality of life; The impact of social inequalities on the quality of life; Transition to a green economy and quality of life; Sustainable cities and the quality of life of their inhabitants.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
