

Special Issue

Sustainable Urban Transport and Logistics Management

Message from the Guest Editors

This Special Issue focuses on the critical need for resilient, low-carbon urban transport and logistics systems in the context of rapid urbanization, increasing traffic congestion, growing emissions, and evolving supply chain challenges. It explores a range of innovative strategies—including multimodal transport optimization, fleet electrification, smart logistics technologies, and AI-driven solutions—aimed at reducing ecological footprints and improving route efficiency. Contributions emphasize data-driven urban freight management, the promotion of shared mobility, and integrated policy frameworks that balance environmental sustainability with economic efficiency. Crucially, the Special Issue highlights the interdependences among public transport equity, last-mile delivery innovation, and urban governance. By bridging academic research with practical case studies, this Special Issue provides actionable pathways for decarbonizing urban mobility while advancing social inclusivity and economic vitality. It calls for interdisciplinary research on smart city initiatives, green logistics, autonomous vehicles, and energy-efficient transportation systems.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
