

## Special Issue

# Application of Green Energy Technology in Sustainable Environment

### Message from the Guest Editors

The main purpose of this Special Issue is to hope to solve current environmental problems from the perspective of green energy technologies. The United Nations has set a goal of carbon neutrality by 2050. However, with the increasingly serious effect of global warming, we must speed up the improvement of the environment. Human beings deserve to use the power of science and technology to improve the environment and make life better. There are still many environmental problems that need to be solved by applying engineering technology. For example, the material technology of aerospace engineering, the fuel used in aircraft or rockets, etc. In addition, the VEH system that converts general mechanical vibration into electrical energy, the vibration reduction of bridge structure, or the reuse of vibration energy, the utilization of wind energy or solar energy, etc. Colleagues are welcome to submit relevant research for this Special Issue. Contributions are welcome as long as they contribute to the planet and our environment from the perspective of green energy technologies.

---

### Guest Editors

Prof. Dr. Yi-Ren Wang

Department of Aerospace Engineering, Tamkang University, New Taipei City 25137, Taiwan

Prof. Dr. Yu-Hsi Huang

Department of Mechanical Engineering, National Taiwan University, Taipei City 10617, Taiwan

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
