

Special Issue

Harmless Disposal and Valorisation of Solid Waste

Message from the Guest Editors

As urbanization accelerates, solid waste management poses a challenge to achieving sustainable development goals. Harmless disposal and resource utilization are essential strategies for minimizing environmental impact of waste and promoting circular economy in green cities. This Issue aims to explore innovative technologies for green and efficient treatment and recovery of valuable resources from solid waste to improve waste management efficiency. Topics of interest include waste-to-energy conversion technologies; data-driven approaches for monitoring and optimizing waste management processes; advanced sustainable disposal methods; resource recovery strategies for waste (such as sludge); effective removal of pollutants (including typical contaminants and emerging pollutants like antibiotic resistance genes and perfluorinated compounds); waste valorization; data processing methods for monitoring and characterizing waste treatment; research progress on current waste treatment methods (including optimization strategies and development trends); methods to improve waste treatment efficiency... Look forward to your submissions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
