# Sustainability of Energy Transport and Storage: Oil and Gas

### Message from the Guest Editors

Nowadays, the energy demand is increasing rapidly worldwide, and the economic, financial, and environmental challenges facing the energy industry are more severe than ever before. Oil and gas continue to be the main energy sources in the world for a long time to come. However, as a typical traditional industry, oil and gas transportation and storage are characterized by high energy consumption, complex processes, long industrial chains, and complex application scenarios. In this case, the transportation and storage of oil and gas urgently require revolutionary change to reach a balance between rapid economic growth and sustainability. Low carbonization and intellectualization have become new trend developmental trends. The green and intelligent transition of oil and gas transportation and storage represents a future research hotspot for sustainable energy supply. This Special Issue is intended as the state-of-the-art resource for researchers, practitioners, and decision-makers interested in studying the sustainability of oil and gas transportation and storage.

# **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
