

Special Issue

Mechanisms, Technologies, and Policies for Carbon Peaking, Carbon Neutral Processes

Message from the Guest Editors

This Special Issue will collect papers on the mechanism and path of green low-carbon development in the industry, low-carbon transition strategy, and government policy support, including but not limited to cleaner production, low carbon efficiency, carbon footprint accounting, low-carbon supply chain, carbon data modeling, and simulation. The issue is planned to bring together academia with the most up-to-date techniques and theoretical expertise to further our understanding of feature utilization industry renovation, as well as inform policymakers about the stringent policy insights required to reach carbon neutrality in time.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
