

Special Issue

Mechanisms, Technologies, and Policies for Carbon Peaking, Carbon Neutral Processes

Message from the Guest Editors

This Special Issue will collect papers on the mechanism and path of green low-carbon development in the industry, low-carbon transition strategy, and government policy support, including but not limited to cleaner production, low carbon efficiency, carbon footprint accounting, low-carbon supply chain, carbon data modeling, and simulation. The issue is planned to bring together academia with the most up-to-date techniques and theoretical expertise to further our understanding of feature utilization industry renovation, as well as inform policymakers about the stringent policy insights required to reach carbon neutrality in time.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
