Special Issue

Sustainable Management: Plant, Biodiversity and Ecosystem

Message from the Guest Editors

Nowadays we live in the age of global climate change, to which not only living beings, populations, ecosystems, but also us, human beings, must adapt. The efficiency of our plant production, animal husbandry, lawn and water management, forestry and also nature conservation activities, which have been operating for decades and even centuries, have been questioned, and in many cases they have ceased to exist. We need to rethink these activities, they need to be redesigned in the light of new environmental challenges. In this way, we must think in the complete restructuring of our relationship with living nature in order to pass on a livable environment for future generations. This is a very big and very urgent task, in short we can formulate it as the 'sustainable management of our living environment'. The basic purpose of this issue is to be a publication forum for the latest results of sustainable nature conservation and agricultural habitat management activities.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
