

## Special Issue

# ESG (Environment, Social and Governance) Strategies, Consumer Behaviour and Community Participation in the Digital Age

### Message from the Guest Editors

We perceived the rising need for better aligning ESG efforts with consumer perception and repositioning consumers' rightful place in stakeholder salience and community engagement from a broader perspective. Especially for customer-based companies that are required to satisfy new digital-age consumers, several research topics emerge and are worth our renewed attention, which the present Special Issue seeks to address. The range of research areas for inquiry includes, but is not limited to, the following aspects:

1. To what extent can customer behaviour influence a firm's ESG marketing strategy?
2. To what extent can a firm's ESG policies influence customer behaviour?
3. To what extent do a firm's ESG metrics influence buying decisions?
4. What are the industry-specific ESG issues concerning consumer rights and protections in the digital age?
5. What are the moderating factors affecting the relationship between ESG efforts and consumer support for ESG?
6. How should organizations engage their consumers to align perceptions to customer support?

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
