Innovative Approaches for Monitoring Water Quality and Environmental Health

Message from the Guest Editors

Researching innovative approaches to monitoring water quality and environmental health is crucial given the current challenges terrestrial water ecosystems face. Rivers such as the Ganges in India and the Yangtze in China are heavily polluted due to industrial discharge, agricultural runoff, and untreated sewage, and this pollution degrades water quality and negatively impacts aquatic life and the surrounding environments. Similarly, lakes like Lake Victoria in Africa and Lake Erie in North America are experiencing eutrophication due to excess nutrients from agricultural runoff and wastewater, which leads to harmful algal blooms that deplete oxygen in the water and damage aquatic life and ecosystem health. Stormwater runoff, pollutants, and habitat modification impact wetlands and urban streams and innovative approaches need to provide timely, accurate, and costeffective monitoring data to plan, manage, and assess alternative control measures.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
