

## Special Issue

# Durability and Performance of Sustainable Construction and Building Materials 2nd Edition

### Message from the Guest Editor

This Special Issue aims to reflect the current state of the art and new developments on the relevant topics in the research field of the durability and performance of classical and new binder systems. We expect a wide range of contributions from interdisciplinary, multiscale, and different approaches to addressing various durability aspects, which will provide a comprehensive background for material engineers, researchers, and experts in the field. We welcome all new ideas on various topics from young researchers as well as leading experts in the field, in the form of experimental or modelling articles, review articles, and case studies to demonstrate the advances in construction and building materials.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
