

Special Issue

Sustaining Growth: Balancing Economic, Social, and Environmental Concerns in Rural and Agricultural Development

Message from the Guest Editor

The special issue will focus upon agricultural innovations which have as their objectives the minimization of adverse environmental impacts and climate change adaptation. The issue will also look at policy and legislative initiatives to support agricultural sustainability. The issue will consider the contribution of local and indigenous knowledge to climate change adaptation. This will include both agricultural methodologies and the adoption of climate resilient orphan crops. The special issue will supplement the existing literature by its focus on practical examples of climate-sensitive agricultural innovations and the regulatory infrastructure for agricultural innovation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
