

Special Issue

Sustainable Building Materials for Greener Future

Message from the Guest Editors

The construction sector's expansion demands reduced reliance on virgin resources, lower embodied energy, and ecosystem protection. This Special Issue, "Sustainable Building Materials for Greener Future", invites cross-disciplinary research/reviews on sustainable development, circularity, resource efficiency, and resilience. We prioritize studies transforming industrial/agricultural/municipal wastes into high-performance, low-CO₂ construction products to close material loops. Submissions may explore innovative mix designs, nano-additives for functionality, and multi-scale modeling to optimize strength, durability, and thermal performance. Encouraged are comprehensive life-cycle assessments, cradle-to-cradle carbon accounting, carbon sequestration analysis, and techno-economic evaluations for eco-efficiency. Highlighting sustainable processing, material characterization, and real-world case studies, this collection aims to accelerate circular economy adoption, reduce environmental footprints, and foster regenerative practices in global construction.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
