Sustainable Project, Production and Service Operations Management

Message from the Guest Editors

Incorporating sustainable practices into project management, manufacturing, and service delivery processes is known as sustainable project, production, and operations management. It involves determining and minimizing the effects of project delivery, manufacturing, and service delivery on the environment, economy, and society. Incorporating sustainability concepts into project management entails creating plans that minimize detrimental environmental and societal effects while fostering economic growth. Sustainable project management aims to eliminate waste, enhance social and economic consequences, and ensure optimal resource usage. For instance, sustainable project management prioritizes minimizing the project's carbon footprint, resource usage, and adverse social repercussions. Modern organizations must manage sustainable projects, production, and service operations. Businesses that want to reduce their adverse effects on the environment, enhance social welfare, and foster economic growth must adopt sustainability strategies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
