

Special Issue

Green Innovation and Knowledge Management in Organizations

Message from the Guest Editors

Many leading companies are considering sustainability as a key part of their business strategy. Green innovation is one of the most important drivers to increase sustainability performance. At the same time, knowledge management has gained considerable attraction from the business sector, being considered a crucial component in formulating strategies, creating new products and services, and overseeing operational processes. The objective of this Special Issue is to promote research concerning the interrelationship between knowledge management practices and green innovation in organisations. This Special Issue invites original papers focusing on, but not limited to, the following topics:

- Impacts of knowledge management on green innovation;
- Green knowledge management;
- Knowledge creation, acquisition, sharing, and application for green innovation;
- Product lifecycle management's contribution to green innovation;
- Knowledge management system requirements for sustainability;
- Knowledge management and green innovation in standardisation;
- Contribution of knowledge management to Sustainable Development Goals.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
