

Special Issue

Disaster Risk Reduction and Resilience for Sustainable Development

Message from the Guest Editor

Disasters are taking a heavy toll on affected individuals, communities, and countries worldwide, but they can also offer a window of opportunity for societies to learn, transform, and become more sustainable and resilient. Incorporating DRR and resilience paradigms into sustainable development has both theoretical and practical implications. This Special Issue offers an opportunity to focus on: a) efforts at the international, national, regional, and local levels to generate knowledge and enhance awareness concerning risk and resilience; b) policy and governance strategies to support risk reduction, enhance resilience, and achieve SDGs in various countries and regions. A wide range of topics will be included in this issue that are related, but not limited to, the multiple dimensions (physical and social) of DRR and resilience, and to barriers and facilitators of DRR, resilience-building, and sustainable development processes. Researchers that have investigated these issues are invited to submit reviews and descriptive or analytical studies for consideration for this Special Issue of *Sustainability*.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
