

Special Issue

Innovation for Sustainable Growth: Strategies, Systems, and Global Perspectives

Message from the Guest Editors

In recent decades, innovation has become a major driver of economic growth, productivity gains, and competitive advantages. However, traditional models of growth are increasingly being questioned in the face of global environmental challenges, social inequalities, and resource limitations. Innovation-driven economic growth refers to development models in which technological advancement, digital transformation, institutional reform, and entrepreneurship fuel long-term progress, while remaining aligned with the Sustainable Development Goals (SDGs). The purpose of this Special Issue is to gather cutting-edge research and case studies exploring the role of innovation as a catalyst for sustainable economic growth, across multiple sectors, regions, and institutional contexts. In this Special Issue, original research articles and reviews are welcome. Research areas may include the following: Innovation systems and sustainable growth models; The role of technological innovation in achieving the SDGs; Green innovation and circular economy strategies; Innovation in emerging markets and developing economies

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
