# Sustainable Air Quality: Studies Based on Fluid Mechanics and Compressor-Less Water-Based Cooling

# Message from the Guest Editors

Driven by economic development and the growing demand for thermal comfort, the energy consumption of Ventilation and Air Conditioning (HVAC) systems is rapidly increasing. The utilization of HVAC has improved people's quality of living, but it has also produced some negative effects on the natural environment. This Special Issue is organized to add recent advances to the information on the studies based on fluid mechanics and compressor-less water-based cooling. We invite the authors to raise awareness of different aspects of the problem or to contribute relevant knowledge on (but not limited to) any of the aspects mentioned below:

- Advanced compressor-less water-based cooling system technologies and applications;
- Novel materials and structures for water-based evaporative cooling devices:
- Sustainable multi-stage hybrid cooling systems;
- Surface wettability theory;
- Indoor air quality;
- System optimal control method;
- Fluid flow, heat transfer, and mass transfer analysis;
- Energy, economy, and environment analysis;
- Manufacturing and commercialization.

# **About the Journal**

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

### **Author Benefits**

# Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
