

Special Issue

Air Quality Management: Strategies to Reduce Air Pollution and Health Risks

Message from the Guest Editor

The special issue *"Air Quality Management: Strategy to Reduce Air Pollution and Health Risks"* in *Sustainability* focuses on the urgent global challenge of managing air pollution and its associated health risks. The articles in this Special Issue addresses interdisciplinary approaches to improving air quality, drawing from environmental science, public health, and policy research. The issue aims to showcase innovative strategies for reducing air pollution, such as policy frameworks, technological interventions, and community-based initiatives. By exploring both local and global case studies, the issue emphasizes the need for tailored, region-specific solutions to mitigate health impacts. Overall, this special issue is designed to enrich the current literature on air quality management by offering comprehensive insights that bridge the gap between theoretical research and practical applications, contributing valuable knowledge to support sustainable development and health protection.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
