Special Issue

Structural Engineering Simulation and Optimization for Sustainability

Message from the Guest Editors

With this Special Issue, we aim to provide a premier international platform for scholars, researchers, academics, and industry professionals to discuss and present the most prominent challenges and developments in structural engineering simulation and optimization for sustainability. This Special Issue is now open for the submission of novel and high-quality research contributions. These submissions can cover a wide range of topics—for example, computer-aided analysis and design, numerical simulation, structural shape and topology optimization, reliability-based design, stochastic structural control, optimal elasticplastic design of structures, and algorithm and software development-though all associated with the field of engineering. We anticipate that this Special Issue will open the door for further advances in technology and research toward ensuring environmental sustainability in this important area.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
