

## Special Issue

# Future Trends in Operationalizing Sustainability in Production and Supply Chain Management

### Message from the Guest Editors

In today's competitive environment, supply chain managers attempt to maximize profits and minimize their costs, due to increased concerns about reducing raw materials, increasing waste, increasing pollutants, spreading pollution and given that failure to observe ethical issues and responsibilities will increase costs. The main aim of this special issue is in about operationalizing sustainability in productions and supply chain management areas (e.g. green logistic management, sustainable or green supplier evaluation and selection, green lean production, application of decision making techniques in sustainable supply chain and operations management, green manufacturing, green lean manufacturing, sustainable supply chain performance, evaluation of sustainable supply chain risks, green operations, green reverse supply chain network, green procurement).

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
