

Special Issue

Advances in Coal Mine Disasters Prevention

Message from the Guest Editors

How the subject relates to the journal scope: Coal accounts for 27.2% of the world's primary energy consumption, and is the largest single source of power generation. The key to realizing the sustainable management of coal is to ensure the safe and efficient supply of coal, the core challenge of which is to reveal the mechanism and take reasonable measures to eliminate disasters. Therefore, the theme of this Special Issue relates to the journal's scope. Suggest themes☒ In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Theory and simulation of deep rock mechanics and seepage;
- Mine water disaster mechanism and prevention;
- Water inrush source, channel and division of danger zone;
- Grouting of roof and floor;
- Roof fall mechanism and prevention;
- Deformation and failure of roadway;
- Mining overburden movement, roof cutting (presplitting) pressure relief;
- Coal and gas outburst;
- CO₂ displacement of coalbed methane;
- Hydraulic (anhydrous) fracturing of coal seams.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
