

Special Issue

Agro-Industrial Residues Treatment, Recycling, and Reuse

Message from the Guest Editors

Dear Colleagues: This Special Issue aims to provide an up-to-date set of information on recent advances in the treatment, recycling, and reuse of agro-industrial residues. We, therefore, encourage the submission of original research articles and reviews concerning (but not limited to):

- Agro-industrial residue characterization and sustainable management;
- The recovery of energy and nutrients, and the synthesis of value-added chemicals from agro-industrial residues (e.g., livestock manure, food processing effluents, dairy by-products, etc.) through biologically mediated technologies;
- The biological treatment and reuse of agro-industrial wastewater;
- The economic and environmental assessment of energy/resource recovery from agro-industrial residues, and discussions of case studies.

Your recent findings on the above-mentioned topics will play an active role in fostering the transition of the agro-industrial sector toward a circular economy-based approach, thus making it more competitive and sustainable. We look forward to receiving your contributions

Guest Editors

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
