# Agro-Industrial Residues Treatment, Recycling, and Reuse

### Message from the Guest Editors

Dear Colleagues: This Special Issue aims to provide an up-to-date set of information on recent advances in the treatment, recycling, and reuse of agro-industrial residues. We, therefore, encourage the submission of original research articles and reviews concerning (but not limited to):

- Agro-industrial residue characterization and sustainable management;
- The recovery of energy and nutrients, and the synthesis of value-added chemicals from agroindustrial residues (e.g., livestock manure, food processing effluents, dairy by-products, etc.) through biologically mediated technologies;
- The biological treatment and reuse of agro-industrial wastewater;
- The economic and environmental assessment of energy/resource recovery from agro-industrial residues, and discussions of case studies.

Your recent findings on the above-mentioned topics will play an active role in fostering the transition of the agroindustrial sector toward a circular economy-based approach, thus making it more competitive and sustainable. We look forward to receiving your contributions

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
