

## Special Issue

# AI-Driven Technology for Sustainable Living

### Message from the Guest Editor

The quality of our daily life is co-determined by critical factors, such as the environment, infrastructure, energy, climate, etc. Emerging technologies profoundly transform our lives. As such, artificial intelligence (AI) has extensively advanced current transportation, public security, and healthcare, catalyzing the revolution of human livelihood. This Special Issue aims to promote the development of sustainable-oriented research for accelerating innovation in critical areas related to sustainable living. We would like to invite the scientific community to submit their research related to AI-driven technologies focusing on sustainability. Contributions can include, but are not limited to, the following: climate change, sustainable public health, sustainable development, artificial intelligence, healthcare, sensors, environmental sust

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
