Special Issue

Al and Machine Learning towards Circular and Sustainable Industry

Message from the Guest Editors

Industries are heavily investing in new digital technologies such as AI, machine learning, and big data analysis, aiming for higher efficiency and new business opportunities. Al is expected to radically change the way companies operate and generate value. For example, in the manufacturing industry, AI creates a lot of opportunities for companies, such as preventive and predictive maintenance, identification of defects in the manufacturing process, demand and forecasting tools or inventory planning. These smart and connected digitalized machines and solutions are expected to result in a higher efficiency of resources and equipment as well as enable cost reductions by decreasing energy consumption, lowering scrap rates, and diminishing production downtime. Despite the positive economic effect, these technologies have a huge potential to contribute to sustainability. However, sustainability benefits are seldom the focus of Al initiatives, and they are very hard to measure on a holistic perspective. More

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
