

## Special Issue

# Sport Science and Sustainable Social Development

### Message from the Guest Editors

The field of sports science has been developing strategies and resources with the aim of improving the quality of life of the population. Thus, from the different areas encompassed by this sector, we have tried to respond to the various issues involved in aspects, such as health and well-being, quality education, gender equality or aspects that, to a greater or lesser extent, have been promoted through the development of this sector due to its multidisciplinary nature, such as decent work and economic growth; industry, innovation and infrastructure; or sustainable cities and communities. To this end, these approaches need to be addressed in an inclusive manner, facilitating development towards a more just and sustainable society. The aim of this Special Issue is to give visibility to works that, by making use of physical activity and sport, manage to respond to one of the Sustainable Development Goals. Therefore, all researchers are invited to present their work on how sporting activity responds to the model of sustainable social development through this Special Issue.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
