

Special Issue

Green Logistics and Sustainable Economy—2nd Edition

Message from the Guest Editor

Green logistics is the fundamental basis for the development of a sustainable economy. Green logistics is very important within the complete cycle of the sustainable circular economy and acts as a main tool for the integrated management of the supply chain and for the development of sustainable production and consumption, which is one of the pillars of the UN's Sustainable Development Goals. The economy as a whole cannot function without the transport of goods along supply chains, nor without proper intermodal operations, the use of various modes of transport with different characteristics, and logistic platforms and logistical operations to optimize efficiency and effectiveness in the supply chain. On the other hand, a sustainable economy needs the development of recycling systems, the reuse of goods, waste reduction, the rethinking of green issues, local and global decisions, the use of sustainable transport materials, the use of green practices, and the elimination and reuse of plastic and packaging, among many other issues.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
