

Special Issue

Agrobiodiversity and Sustainable Food Systems

Message from the Guest Editor

Plant diversity is essential for healthy diets and sustainable food production. Crop diversity is maintained in seed banks where the Global Seed Vault at Svalbard houses a backup of world's plant genetic resources. Production, on the other hand, tends to focus on limited numbers of crops and with a limited genetic background. With the ongoing climate change, we see many challenges in sustaining the food security. In this Special Issue, we welcome philosophical, theoretical, and practical review and research papers on different approaches of diversification and sustainability in our food systems. This can be on over-viewing genetic resources, farmers' access to plant diversity, or constraints in production, marketing, and trade. We welcome contributions on under-utilized crops, food trees/agroforestry, traditional vegetables, and indigenous knowledge related to the production and use of plants.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
