

Special Issue

Advances in Sustainable Supply Chain Management and Industry Dynamics

Message from the Guest Editors

Sustainability has evolved from a vague concept to something that academics and practitioners seek to make more explicit and refined. Although over the years various theoretical frameworks have been developed to examine and aid the transition of traditional supply chains to sustainability, the move to a sustainable paradigm is a long and difficult process. Therefore, supply chains are faced with various barriers and particularities and it is crucial to extend the knowledge surrounding sustainable supply chains. Moreover, the situation is getting more complex as supply chains are faced with emerging issues that act as disruptors and reshape entire sectors.

This Special Issue invites papers adopting both theoretical and empirical approaches to shed light on the evolving role of all pillars of sustainability in supply chains and its effect on industry dynamics. We welcome papers using different research methods (quantitative, qualitative, mixed), addressing topics in various economic settings and sectors at the domestic, regional and international level.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
