Special Issue

Accessible Transport and Mobility Options in an Ageing Society

Message from the Guest Editors

The aging of the world's population, especially in cities, is contributing to the re-shaping of existing population demographics. This implies that tailored research is crucial in order to provide directions to target more effective policies. It is necessary, in this context, to understand the challenges faced by both older adults and policymakers.

The goal of this Special Issue is to present transport solutions, strategies, and policies that promote accessibility for older adults and endorse sustainable mobility. Possible approaches include, but are not limited to: data analyses, studies, and investigations about elderly mobility behaviour; services offered to improve elderly mobility; transport equity issues; planning strategies and policy suggestions that may help us to transition towards a more accessible system; and applications to case studies. Interdisciplinary approaches are also welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
