Active Transport among University Students: Patterns, Motivations and Challenges

Message from the Guest Editors

The Special Issue aims to contain insights into university students' mobility patterns, motivations, and challenges. This Special Issue particularly focuses on the attitudes of students towards active modes of transport, as well as on their behavior while using them during regular, COVID-19 and post-COVID-19 times.

More specifically, the scope of the Special Issue includes the following:

- Mobility challenges of university students
- Mobility preferences (mode and route choice) of university students
- Road safety behavior of university students as active mode users
- University students' attitudes towards active mobility and emerging mobility schemes
- Behavioral change activities focusing on university students
- Universities and sharing mobility schemes
- Universities' mobility plans
- Accessibility and walkability of university campuses/university cities
