

Special Issue

Monitoring and Intervening with Adolescent Green Attitudes and Values

Message from the Guest Editor

Given the current striving for sustainability and the corresponding paradigm shift, a concerted action in form of a special issue about environmental attitudes and values may help to put the pieces together to a smooth mosaic. During the last three decades, just two main models were repeatedly and independently confirmed, the NEP and the 2-MEV. Both provide a commonly agreed empirical basis for 1) comparing individual socio-demographic studies, and 2) comparing outcomes of short- and long-term educational programmes. On the bases of original empirical research this upcoming special issue is planning to publish educational applications of both measurement initiatives. The deadline for manuscript submission is set until 15 February 2020.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
