

Special Issue

Adoption of Renewable Energy Technologies (RETs) to Achieve Sustainability

Message from the Guest Editors

Dear colleagues, The International Renewable Energy Agency (IRENA) has claimed that the energy sector contributes nearly two-thirds of global greenhouse gas (GHG) emissions. In this regard, alteration of the global energy system, with a specific focus on the adoption of renewable energy technologies (RETs), is becoming crucial. Therefore, targets of both reducing GHG emissions and fostering more sustainability would be both an opportunity and a societal priority. This Special Issue is a platform to motivate prominent researchers to share the latest developments in renewable energy systems and policy and address issues of novelty and scientific relevance in the design, assessment, and improvement of these technologies for a more sustainable future. In this regard, authors worldwide are invited to contribute their full-length, peer-review-ready papers on the following but not limited topics:

- Renewable energy technologies;
- Renewable energy applications;
- Renewable energy policy, management, and governance;
- Case studies encompassing renewable energies and sustainable development

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
