Advance in Plant Breeding and Plant Biotechnology for Sustainable Agriculture

Message from the Guest Editor

The world's population has crossed the threshold of 7 billion, with the greater percentage of people living in less-developed or developing countries. Clearly, food security in such nations will be an essential worry over the next few decades. There is a definitive need to utilize new innovations which could assist us with controlling this food instability. Globally, biotechnology is perceived as a growing, complex, and broad innovation. It has reformed all fields of life. By the usage of this technology, we have achieved remarkable success in increasing crop productivity, improving crop quality and overcoming food shortage. We encourage researchers and practitioners to submit original research articles, case studies and review articles in related fields.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
