

## Special Issue

# Advances in Integrated Approaches for Disaster Science and Sustainable Development

### Message from the Guest Editors

Research and practice have shown over the years that disasters and development exhibit strong interdependence. Disaster risk is a cross-cutting issue that influences multiple sectors, and disaster impacts are known to be amplified due to unsustainable development practices that increase exposure and vulnerability of communities, physical assets, and economies. The objective of this Special Issue is to present original contributions discussing theoretical frameworks, methods, and case studies addressing the interrelations between the several disaster risk management stages and sustainable development across different sectors and different worldwide regions. Given the interdisciplinary nature of the different disaster risk management dimensions, and the cross-disciplinary nature of research addressing sustainable development, contributions from the social and the physical sciences, including environmental science, engineering, urban planning, public health, geography, sociology, and human ecology, among others, are welcomed.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
