

## Special Issue

# Sustainable Agriculture and Climate Resilience

### Message from the Guest Editors

Dear colleagues If sustainability focuses on preserving our ecosystems, adaptation and resilience concentrate on protecting people from the changes brought by a changing climate to the ecosystems and allow them to absorb, withstand, and bounce back after climate adversities. Therefore, this Special Issue will explore the interconnections and tradeoffs between different agriculture practices and ecosystems and their adaptation and resilience capability under climate change conditions. Focus: Agricultural practices (including livestock production and fisheries) in all geographical locations and hydro-climatic conditions. Scope: Investigations of the adaptation and resilience of agro-systems to climate change in terms of the interconnection between social, environmental, and economic outcomes. Purpose: Adding to the scientific literature and show to the agro-food sector the sustainable practices that could create a balance between the three pillars of sustainability and improve social well-being, increase economic outcomes, and reduce negative environmental externalities.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
