Special Issue

Agricultural R&D: Recent Trends and Tools for the Innovation Systems Approach

Message from the Guest Editors

It is my pleasure to invite you to submit a scientific paper to the Special Issue "Agricultural R&D: Recent Trends and Tools for the Innovation System Approach". This Special Issue aims to deal with agricultural development in general, both in developed and developing countries. looking at both the strictly agricultural topics and the socioeconomic issues of rural areas. We also consider it very important to make explicit reference to sustainable agricultural development, in particular the Sustainable Development Goals defined by the UN and the issues of the circular economy. Another fundamental topic is the methods for monitoring and verifying the results of Innovation System actions. Finally, we also propose the description of Innovation System experiences implemented in individual geographical areas and also possible tools for the transfer and update of experiences from one region to another. We are looking for studies that clearly describe both the theoretical foundations of the adopted methods and how they have been implemented or how they can be implemented, with detailed case studies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
