Special Issue

Frontiers in Agrifood Value Chain and Sustainable Agriculture Economics

Message from the Guest Editors

Food systems present many interlinked challenges that threathen their sustainability, such as changing climate conditions, deteriorating natural resources, increasing power imbalances in the agrifood value chain, changing demographics and dietary habits. This Special Issue calls for papers to share their findings on actions aimed at developing pathways to transform the existing agrifood value chains into more economic, inclusive and sustainable ones. Taking a multidisciplinary approach, papers should have a specific focus on one or more of the following areas (not an exhaustive list):

- Transition towards climate neutral and resilient farming systems;
- Sustainable natural resource management;
- Technological, nature-based and institutional innovations in agrifood value chains;
- Sustainable and innovative business models in agrifood systems;
- Analysis of governance models for sustainable and competitive agrifood value chains;
- Circular economy analysis in the agrifood chains;
- Sustainable food consumption and healthy diets:
- Policy contribution to sustainable and competitive agrifood chains.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
