Successful Agricultural and Socioeconomic Transformation in Mountain Areas

Message from the Guest Editors

The future of mountain regions strongly depends on what happens outside the mountain ranges; local solutions must be implemented. Most challenges, such as over-tourism, agricultural policies and mobility, are due to processes and developments that originate from the outside. Considering geographic interrelationships is crucial for understanding cause and effect.

Contributions are welcome, but not limited to, the works presenting implemented projects and activities in the framework of smart and socio-ecological transformations, dealing with local/community and regional development, governance and political sciences. For further reading, please visit the [Special Issue website](#).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
