

Special Issue

Evidence-Based Solutions for an Agro-Ecological Transition

Message from the Guest Editors

The transition towards sustainable agricultural production systems defines the current debate in European agricultural policy. Temporal and spatial diversification of cropping systems, multifunctional land use, or novel water and nutrient-saving techniques for building up climate resilience are just some of the practical examples that may contribute to the implementation of sustainability in agroecosystems. This Special Issue of *Sustainability* aims to collect a wide range of applied research results on new, practical solutions and innovative sustainable technologies applied within the context of organic agriculture, agroecology, agroforestry, permaculture and farm animal production systems (including pastoralism, bee-keeping, or other animal farming methods). Studies of sustainable practices and solutions conducted in cooperation with farmer networks and communities and/or using a Living Laboratory approach are especially welcome. About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
