

Special Issue

Air Circulation and Indoor Air Quality

Message from the Guest Editors

This Special Issue invites original research in the area of indoor air quality monitoring, control technologies, air pollution modelling, and other smart technologies to improve indoor air quality. Topics of this Special Issue include but are not limited to the following specific issues: Ventilation and air circulation; CFD and building simulation; Air cleaning and filtration; Sources and emissions; Indoor particulate matters, volatile organic compounds and microbes; Perceived air quality; Indoor environmental quality; Energy and climate challenge; Smart sensors for indoor air monitoring

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
