The Future of Nature: Alternative Approaches to Sustainable Development

Message from the Guest Editors

Academics and policymakers draw diverse views on what the future of nature and the natural world should look like. Discussion of what, if anything, should be done to protect and conserve the natural world has become a source of both academic discussion and policy debate. While there is consistent agreement that conservation is desirable, little agreement exists among policymakers about how to do so. In practice, the desire to conserve the natural world has manifested itself through proposed policy solutions that focus on the use of regulatory rules or improved social planning. A wide literature explores these solutions in some detail. In practice, however, these approaches face stiff resistance in policy implementation since they are often viewed as conflicting with goals to increase standards of living and economic development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
