Sustainable and Alternative Cementitious Materials

Message from the Guest Editors

Within an increasing global population, especially in cities, the demand for construction and building materials has also increased significantly. This increase has in turn resulted in a significant growth in the utilization of natural resources. Ordinary Portland cement (OPC) is typically the material used in the greatest amount in construction due to its wide availability and attractive durability and strength properties. However, significant opportunities for improvement of OPC-based concretes exist, which can provide lower carbon dioxide emissions and better durability behavior. These alternative cementitious materials, such as calcium sulfoaluminate cements, calcium aluminate cements, and alkali-activated materials, may provide opportunities for sustainable development through minimizing the usage of natural resources and result in more sustainable construction materials...

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
