Anthropogenic Effects on Hydrological Drought and Its Impact on Society in Drylands

Message from the Guest Editors

Despite the importance of droughts for living conditions in drylands, little is known about their frequency, magnitude, propagation and recovery phase. This lack of knowledge hampers any attempt to include drought and its postphase effects as part of integrated drought management strategies. In this context, it is pivotal to understand how climate change and catchment-scale anthropogenic activities, such as land use and water abstraction, affect the start, development, end and post-phases of hydrological drought, and how human-induced/modified droughts socioeconomically impact dryland populations, through human migration and losses of agricultural production, for example. In this Special Issue, we aim to gather contributions focusing not only on the anthropogenic effects on hydrological drought and its post-phase in drylands, but also on the impact of human-induced/modified drought on society, highlighting its effects on agricultural production losses, human migration, and any other relevant socioeconomic topics.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
